REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The previously applied prior art of Fujimoto et al (6,236,291), Miyamoto et al (US 6,626,270), and Miyamoto et al (2002/0165028) teach a game system comprising a first processor based in a game apparatus (console) operatively connected a second portable handheld game unit including a second processor. While the primary (console) system of the prior art is capable of producing texture mapped polygon graphics the portable unit of the prior art is only taught as providing a player specific view point in a three-dimensional world. The above references fail individually or in combination to incorporate mapped polygon graphics. References such as "Realtime graphics on the Gameboy Advance" (not relied upon) teach that this feature may be incorporated into the portable handheld game machines of the previously relied upon art however fail to establish a priority prior to invention by applicant. As such the above reference only serves to reassert that the portable game system of the prior art did not incorporate a polygon based graphic system in it's originally presented design and instead this feature must be added through software.

In view of the specification and figures presented by the applicant, the presented portable game system is understood to be a handheld type game system and not to include art understood console-to-console type gaming (i.e. LAN based computer gaming).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
